

NOTABLE INDIVIDUALS in Science & Technology

PIONEERS · VISIONARIES · ARCHITECTS OF THE MODERN WORLD

01

Nikola Tesla

1856 – 1943

ELECTRICAL ENG.

Invented AC electricity and the Tesla coil, revolutionizing global power systems.

02

Marie Curie

1867 – 1934

PHYSICS · CHEM.

First to win two Nobel Prizes. Discovered polonium and radium; pioneered radioactivity research.

03

Albert Einstein

1879 – 1955

THEORETICAL PHYS.

Formulated relativity ($E=mc^2$), transforming our understanding of space, time and energy.

04

Alan Turing

1912 – 1954

COMPUTER SCIENCE

Father of theoretical CS and AI. Conceived the Turing Machine and broke the Enigma cipher.

05

Isaac Newton

1643 – 1727

MATHEMATICS

Laid foundations of classical mechanics, invented calculus, and described universal gravitation.

06

Rosalind Franklin

1920 – 1958

MOLECULAR BIO.

Her X-ray crystallography revealed the double-helix DNA structure, defining modern genetics.

07

Stephen Hawking

1942 – 2018

COSMOLOGY

United quantum mechanics with general relativity; discovered Hawking Radiation from black holes.

08

Tim Berners-Lee

1955 – Present

INFO. TECHNOLOGY

Invented the World Wide Web in 1989, connecting billions through open hyperlinked systems.

09

Ada Lovelace

1815 – 1852

COMPUTING

Regarded as the world's first computer programmer. Her notes on Babbage's Analytical Engine described the first algorithm — a

10

Katherine Johnson

1918 – 2020

AEROSPACE MATH

NASA mathematician whose orbital calculations were critical to the first U.S. crewed spaceflights, including the historic Apollo 11

"The important thing is not to stop questioning. Curiosity has its own reason for existing."

— ALBERT EINSTEIN
